Partnerstwa w projektach LIFE

Karolina Wądołowska

8 maja 2025 r.

Element współpracy w projektach LIFE – Konsorcja projektowe

Looking for a partner?

Your LIFE project could be more successful if you collaborate with like-minded partners. You can find potential partners through:

- 1-to-1 meetings with other applicants on the [networking platform](#) launched during the EU LIFE Info Days
- [Funding & tender opportunities portal](#)
- [Enterprise Europe Network](#)
- Your nearest [National Contact Point \(NCP\)](#)

Gdzie szukać partnerów do projektu LIFE?

**#EULife25
INFO DAYS**

13 - 15 May 2025

[Home](#) [Agenda](#) [Networking](#) [Virtual meetings](#)

The banner features a vibrant illustration of a sustainable landscape. On the left, a person cycles past solar panels. In the center, a wind turbine stands near a lake with a dog and a tractor. On the right, a woman in a yellow coat holds a butterfly, and a circular arrow symbolizes a recycling process. The background includes rolling green hills, mountains, and a bright sun.

Po ogłoszeniu naborów do Programu LIFE, Komisja Europejska uruchamia platformę do spotkań brookerskich.

UWAGA - publikacja swojego ogłoszenia wymaga założenia konta na portalu.

LIFE Programme

The LIFE programme is the EU's funding instrument for the environment and climate action. Created in 1992, it has co-financed thousands of projects. The [LIFE programme 2021-2027](#) is managed by the European Climate, Infrastructure and Environment Executive Agency (CINEA) and has a budget of €5.4 billion. It is divided into four sub-programmes:

- Nature and biodiversity
- Circular economy and quality of life
- Climate change mitigation and adaptation
- Clean energy transition

More detailed information on the LIFE programme is available on the [CINEA Website](#).

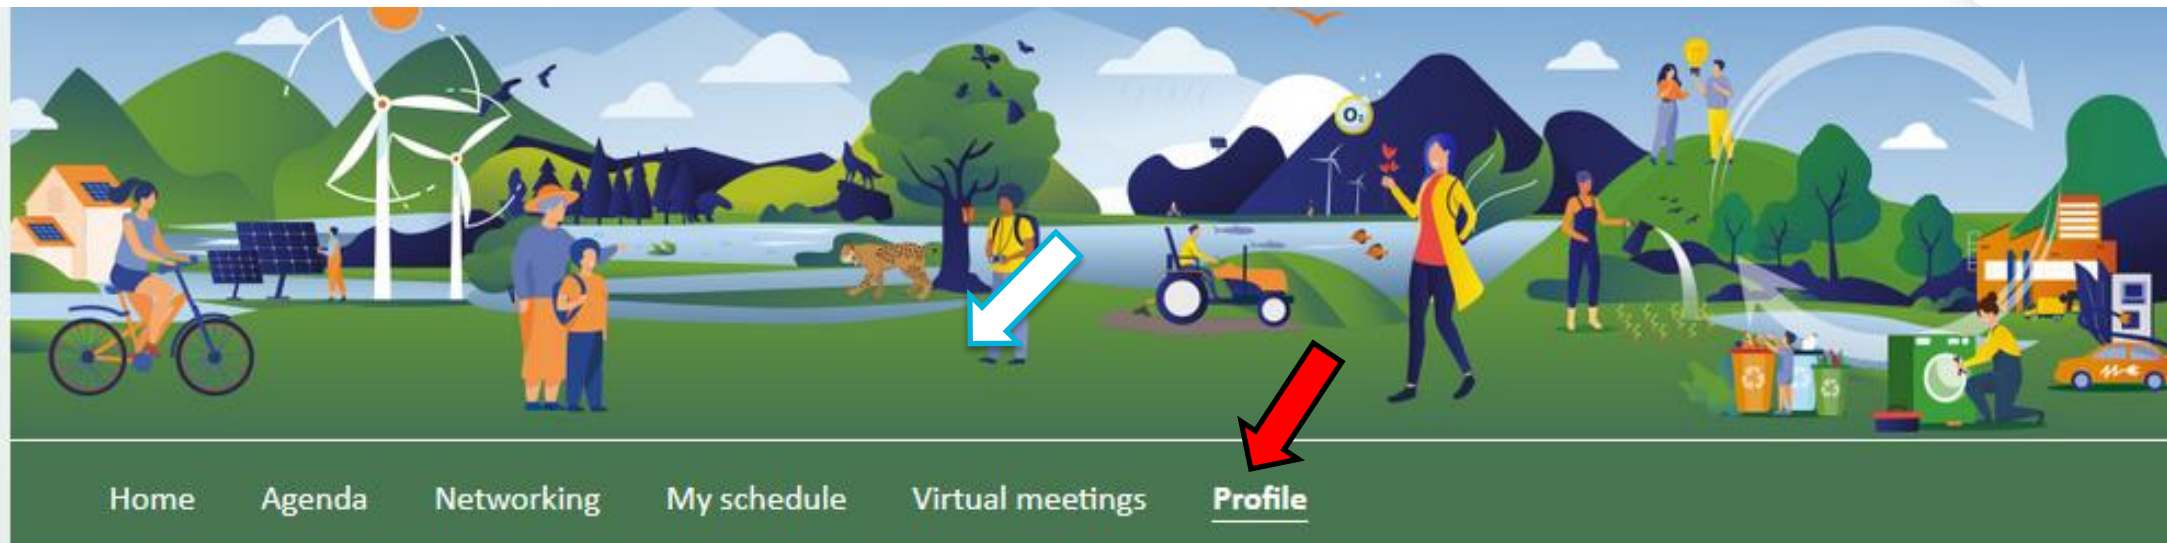

All LIFE Calls for proposals 2025 are expected to be published on the [Funding & tender opportunities portal](#) on 24 April.

Virtual 1:1 networking

A matchmaking event is a quick and easy way to meet potential cooperation partners to decide on a possible future collaboration. Networking opportunities in the format of 1:1 bilateral virtual meetings among potential applicants and with representatives of National Contact Points (NCPs) are available during the period from 13 May to 30 September 2025.

- You can identify them on the [Networking tab](#) and select them based on their **areas of activity**.
- Please, indicate the **area and subject** of your proposal in the meeting request.
- **Meeting requests have to be approved to be scheduled.**

A number of **representatives of National Contact Points (NCPs)** will also be available for **bilateral virtual meetings with potential applicants**.

On [My schedule](#) you will find your session registration and your pending and accepted meeting requests. Here you can [indicate your availability](#) for meetings.

Timeline

- **Send, receive and confirm 1:1 meeting requests among potential applicants and/or with representatives of National Contact Points (NCPs).**
- **Confirmed meetings are scheduled from May 13, 2025 (3:30 AM) to September 30, 2025 (6:00 PM) based on participants' preferences**
- **Note: meetings are managed virtually** via video conferencing call, a service provided by this platform.

Period	Task	Description
March - Sept.	Registration Publish your profile & collaboration wishes	Register Publish your organisational focus and your collaboration wishes. The better your profile the more meeting requests you will receive.
13 May - 15 Sept.	Book 1:1 meetings	Meeting requests have to be approved to be scheduled.
13 May - 30 Sept.	1:1 Meetings via video calls	You can view your 1:1 meeting schedule at any time on your profile.

Programme for the Environment and Climate Action (LIFE)

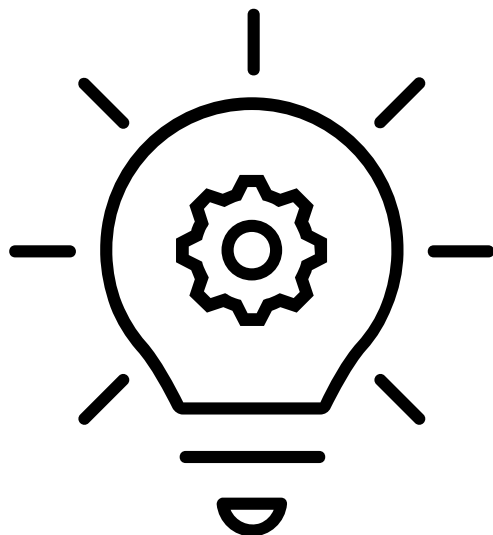

Created in 1992, the LIFE programme is the EU's funding instrument for the environment and climate action, which has co-financed more than 5,000 projects helping Europe to become greener. As of 2021, the LIFE programme includes the new Clean Energy Transition sub-programme.

The overall budget for the implementation of the LIFE programme 2021-2027 will be EUR 5.432 billion.

Join us and submit your project ideas under the Calls for proposals to address the challenges of environmental degradation, climate change and a clean energy transition.

Portal EU Funding & Tenders Portal:

<https://ec.europa.eu/info/funding-tenders/opportunities/portal/screen/programmes/life2027>

Każde z czynnych zaproszeń do składania wniosków ma zakładkę **Partner search announcements**, gdzie można znaleźć ogłoszenia o poszukiwaniu partnerów do projektu, jak i opublikować swoje ogłoszenie.

We are looking for partners for this call. We explore urban issues, share the values of a fair, green, and inclusive city, and take action to make it real. Our work resonates with the principles of the New European Bauhaus, combining sustainability, aesthetics, and inclusion in urban development. For the past 3 years, we have been greening public spaces in Ukrainian communities through participatory approaches, and we are eager to scale this work and exchange practices with European partners.

Program for the Environment and Climate Action (LIFE)

Instrumentem finansowania działań na rzecz środowiska i klimatu, w ramach którego współfinansowano ponad 5000 projektów bardziej ekologiczną. Od 2021 r. program LIFE obejmuje nowy podprogram „Przejście na czystą energię”.

Całkowity budżet programu na lata 2021–2027 wyniesie 5,432 mld EUR.

Dołącz do nas w celu sprostania wyzwaniom związanym z degradacją środowiska, zmianą klimatu i przejściem na czystą energię.

Soil condition improvement through rock-cellulose waste pellets and impregnated wood chips

Reference: LIFE22-ENV-PL-SoilLifeBoats/101113635 | Acronym: LIFE22-ENV-PL-SoilLifeBoats

PROJECT DESCRIPTION

BACKGROUND

The project focuses on three environmental problems:

Excess cellulose / cardboard waste

Excess rock gravel and slurry waste from the stone construction industry

Decreased soil quality caused by climate changes and human activities

Both cellulose and silicate minerals are key players in long-term carbon sequestration in soil. Rock cellulose pellets (RCP) produced from wastepaper short cellulose fibres and rock-dust slurry waste have shown benefits for improving soil quality. Tightly pressed wasted cellulose fibres from the paper industry constitute the organic matrix of the RCP. Fine rock particles (marble, granite and basalt), in the form of slurry waste from the construction industry, provide the mineral 'scaffold' of the RCP.

Earlier observations have shown a great variety of mesofauna living in RCP buried in soil, especially during dry periods and in arid soils. The high porous structure of the RCP composite results in a strong capillary force that attracts water into the pellets. As a result, soil microorganisms that are under water-

OBJECTIVES

The objective of the SoilLifeBoats project is the improvement of soil condition, soil mineral structure and carbon content through the agricultural and horticultural use of composite rock cellulose pellets (RCP) made from short-fibre cellulose waste and gravel and slurry rock waste.

The project develops, demonstrates and promotes an innovative technique for producing RCP, and promotes a new method of soil structure and biodiversity improvement, by using the RCP and wood chips impregnated with NPK (nitrogen, phosphorus, potassium) fertilisers.

The project aims at burying approximately 200 tonnes of RCP (100 tonnes of RCP including 50 tonnes of cellulose and 50 tonnes of stone, plus 100 tonnes of hydrosol).

The specific project objectives include:

- Demonstration of SoilLifeBoats technology in five European cities
- Application of SoilLifeBoats technology on 18.5 hectares
- Construction of a prototype installation for RCP production
- Production of 200 tonnes of SoilLifeBoats for demonstration
- Recycling of 50 tonnes of cellulose waste
- Recycling of 50 tonnes of rock waste from the stone construction industry

RESULTS

The project's expected results are:

- Greenhouse gas (GHG) sequestration after pellets buried for four years: 240 tonnes of CO₂
- Reduction of GHG emissions through buried silicate rock with pellets: 50 tonnes of CO₂
- CO₂ reduction resulting from recycling paper waste instead of burning it: 39.75 tonnes
- Reduction of GHG emissions during the project: 89.75 tonnes of CO₂
- Improved soil quality (organic matter, retention and biodiversity) in targeted orchard areas in pilot countries (Poland, Slovakia, Germany and France) with soil quality problems: 19.75 hectares.
- Three years after the end of the project, improvement of the soil quality (organic matter, retention and biodiversity): 40.685 km².

Dzień drugi – konferencja stacjonarna 13 maja 2024 r., godz. 09.00-16.00:

<https://forms.office.com/e/PPVh31ab4M>

**Konferencja stacjonarna odbędzie się w hotelu
Novotel Warszawa Airport.**

Adres: ul. 1 Sierpnia 1, 02-134 Warszawa

Podczas Dni Informacyjnych LIFE 2025, przedstawiciel Komisji Europejskiej (CINEA) przedstawi informacje o nowych, tegorocznych naborach, ogłoszonych 24 kwietnia br. Nasi goście z KPK innych programów opowiedzą o możliwościach finansowania projektów z różnych funduszy europejskich. Będzie można zapoznać się z możliwościami, jakie oferuje Program LIFE oraz ciekawymi projektami, realizowanymi przez polskich Beneficjentów. Zapraszamy, zarówno do zwiedzania stoisk projektów, jak i poznania doświadczeń Beneficjentów LIFE, podczas sesji plenarnych.

Zachęcamy Państwa do zarejestrowania się i wzięcia udziału w obu wydarzeniach:
